

NAM VIET OCCUPATIONAL SAFETY TRAINING AND ENVIRONMENTAL MONITORING CO., LTD.

Full name:	Year of birth:
Company:	

Please circle one (01) correct answer.

Question 1: Which of the following weather conditions can cause brittleness and breakage of plastic parts in labeling machines?

- a) High temperature and low humidity
- b) Low temperature and high humidity
- c) Temperature is too low
- d) High temperature and high humidity

Question 2: When operating a labeling machine in an environment with excessive noise, what risks can occur?

- a) Slow down production progress due to workers losing concentration
- b) Reduced machine durability due to strong vibration
- c) Increased work efficiency because workers get used to the noise
- d) Improve communication between workers

Question 3: What is the most likely risk when operating a labeling machine in a high humidity environment?

- a) The machine's cooling system works better
- b) Accelerated wear of metal parts due to corrosion
- c) Reduce the risk of engine overheating
- d) Does not affect the machine's operating performance

Question 4: What is one important measure to help reduce the risk of weather conditions affecting labeling machines?

- a) Only operate the machine at night to avoid the heat.
- b) Place the machine in a sheltered and temperature controlled environment.
- c) Keep the machine running continuously to avoid weather effects.
- d) No measures are required as the machine can withstand all conditions.

Question 5: What can happen if the technical condition of the labeling machine is not checked and maintained regularly?

- a) The machine operates more smoothly because it is not affected by humans.
- b) Productivity increases due to continuous machine operation without interruption

- c) Increased risk of breakdown, electrical short circuit and work accidents
- d) Not much affected because the machine can self-adjust its operation.

Question 6: Which of the following factors does not belong to the group of impacts of the working environment on the operation of labeling machines?

- a) Insufficient lighting in the factory
- b) Noise level from surrounding equipment
- c) Quality of labels used to stick on products
- d) The ambient temperature is too high or too low

Question 7: What role does training knowledge and skills for workers play in operating labeling machines?

- a) Helps workers work faster but is more prone to errors
- b) Help workers recognize risks and operate more accurately and safely
- c) Helps workers focus only on performance without worrying about safety
- d) There is no major impact because the machines operate automatically.

Question 8: When the ambient temperature is too high, what can happen to the labeling machine motor?

- a) Faster engines increase productivity
- b) The engine may overheat, reducing performance and increasing the risk of damage.
- c) There is no effect because the machine is designed to withstand heat well.
- d) Helps the machine save energy by not needing to restart many times

Question 9: Which of the following measures helps ensure safety when operating labeling machines in dusty environments?

- a) No special measures are required as the machine can operate under all conditions.
- b) Expose the machine directly to the environment to test its durability.
- c) Equip dust filter system and clean machine regularly
- d) Reduce the machine's operating speed to limit the impact of dust.

Question 10: What is one of the causes of incorrect labeling position when operating a labeling machine?

- a) Labels are so well preserved that they are too sticky.
- b) The machine has a software error or mechanical component failure.
- c) Operator standing too far from the machine
- d) Too quiet environment is distracting

Question 11: Employees have the right to refuse to do work or leave the workplace while still receiving full pay and not being considered as violating labor discipline when they clearly see a risk of a work accident that seriously threatens their life and health and must immediately report to the person directly in charge, true or false?

- a) True
- b) False

Question 12: The elements that make up a normal flame are

- a) Oxygen
- b) Combustible
- c) Heat source
- d) Both sentences (a and b) are correct.
- e) All three sentences (a, b, c) are correct.

Question 13: When a worker has a work accident caused by the Employer's fault and his/her working capacity is reduced by 81%, how much compensation will he/she receive?

- a) 30 Months of minimum wage
- b) 30 Months of Social Insurance Salary
- c) 30 months salary according to labor contract.

Question 14: When suffering from an occupational disease with a 40% reduction in working capacity due to the fault of the employer, what benefits will the employee receive if the employer does not pay unemployment insurance and occupational disease insurance?

- a) Monthly allowance
- b) One-time subsidy
- c) Not entitled to benefits

Question 15: Equip yourself with adequate personal protective equipment to

- a) Preventing work accidents
- b) Preventing occupational diseases
- c) Both of the above

Question 16: Fire prevention and fighting measures are

- a) Propaganda and education measures
- b) Technical measures
- c) Administrative and legal measures
- d) Measures to choose fire-resistant or non-fireproof materials right from the design of the constructions
- e) Measures for periodic inspection, maintenance and repair of machinery

- f) All 3 sentences (a, b, c) are correct.
- g) All 05 sentences (a, b, c, d, e) are correct

Question 17: According to the Law on Labor Safety and Hygiene, how many obligations do workers have?

- a) have an obligation.
- b) has 2 obligations.
- c) has 3 obligations.
- d) has 4 obligations.

Question 18: What will workers get when they have occupational diseases?

- a) Treatment and leave from work.
- b) Treatment until recovery and return to old job.
- c) Treatment until recovery and reassignment to work suitable to health.
- d) Provide financial assistance and help find another job.

Question 19: Which of the following subjects are required to receive occupational safety and hygiene training?

- a) Employed people, newly recruited people
- b) Apprentices and trainees
- c) Probationers and freelance workers hired by the establishment
- d) Both sentences (a and b) are correct.
- e) Both sentences (a, c) are correct.
- f) All 3 sentences (a, b, c) are correct.

Question 20: While working, workers can omit some of the contents of the safe working process to do the job faster.

- e) True
- f) False
