Please circle one (01) correct answer.

Question 1: Which factor has the greatest influence on product quality when operating a wood panel press?

- a) Machine operating speed
- b) Wood moisture
- c) Air pressure in the workshop
- d) Type of glue used

Question 2: When the temperature is too low, what is the most serious problem that can occur during the plywood pressing process?

- a) The machine is overloaded, causing engine damage.
- b) Wood becomes brittle and breaks easily
- c) The adhesive does not work effectively, reducing product quality.
- d) The press is jammed due to thermal expansion of the components.

Question 3: If wood dust is not controlled in the working environment, what consequences can occur?

- a) Causes faster wear and tear on the juicer components
- b) Impact on workers' respiratory health
- c) Reduces the adhesion of the glue
- d) A and B are both correct

Question 4: Why can bad weather conditions such as storms affect labor safety when operating a wood panel press?

- a) Increases the risk of electrical short circuit and equipment damage
- b) Distracting workers due to bad weather
- c) Reduced quality of input wood
- d) A and B are both correct

Question 5: What is one of the biggest risks when a wood panel press is not regularly maintained?

- a) The machine operates at a faster speed than normal.
- b) Worn components can cause serious work accidents.
- c) Plywood quality increases due to less machine adjustments
- d) Reduced energy consumption due to less maintenance

Question 6: What happens if workers do not have safety knowledge when operating a wood panel press?

- a) They may accidentally damage the machine or cause an accident.
- b) The press will not work.
- c) The size of the wooden board product will be reduced.
- d) No problem, just follow the basic instructions

Question 7: Which factor is NOT the cause of the wood panel press machine operating asynchronously?

- a) Machine control system error
- b) High humidity working environment
- c) Improper maintenance
- d) Poor operating skills of workers

Question 8: When the workshop is cramped and lacks light, which risk is most likely to occur?

- a) Workers are easily distracted and make mistakes.
- b) Machines work faster than usual
- c) The process of pressing the wood panel will take place faster.
- d) No significant effect

Question 9: To optimize the operating efficiency of the wood panel press, which factor should businesses invest in the most?

- a) Increase the number of wood panel presses
- b) Increase production speed without improving technology
- c) Training safety skills and knowledge for workers
- d) Reduce maintenance costs to save budget

Question 10: When the wood panel press is partially damaged but can still operate, what is the best safety measure?

- a) Continue operating until the machine stops completely.
- b) Ask the worker to readjust the pressing pressure.
- c) Stop operation immediately and check machine condition
- d) Reduce machine speed to avoid further damage

Question 11: What is the purpose of occupational safety and hygiene?

- a) Ensure safety for workers, minimize or prevent accidents, injuries or deaths at work.
- b) Ensure that workers are healthy and do not suffer from occupational diseases or other illnesses caused by poor working conditions.

- c) Maintain, restore health and prolong working time for workers.
- d) All 3 sentences a, b and c

Question 12: According to the Law on Labor Safety and Hygiene, how many obligations do employees have?

- a) have an obligation.
- b) has 2 obligations.
- c) has 3 obligations.
- d) has 4 obligations.

Question 13: When a worker has a work accident caused by the Employer's fault and his/her working capacity is reduced by 81%, how much compensation will he/she receive?

- a) 30 Months of Minimum Wage
- b) 30 Months of Social Insurance Salary
- c) 30 months salary according to labor contract.

Question 14: Employees who work continuously for 8 hours or 6 hours according to the provisions of the 2020 Labor Code are entitled to a break of at least how many minutes, counted as working hours?

- a) 20 minutes
- b) 30 minutes
- c) 40 minutes
- d) 50 minutes

Question 15: Employees have the right to refuse to do work or leave the workplace while still receiving full pay and not being considered as violating labor discipline when they clearly see a risk of a work accident that seriously threatens their life and health and must immediately report to the person directly in charge, true or false?

- a) True
- b) False

Question 16: What will workers get when they have occupational diseases?

- a) Treatment and leave from work.
- b) Treatment until recovery and return to old job.
- c) Treatment until recovery and reassignment to work suitable to health.
- d) Provide financial assistance and help find another job.

Question 17: While working, workers can omit some of the contents of the safe working process to do the job faster.

- a) True
- b) False

Question 18: Equip yourself with adequate personal protective equipment to

- a) Preventing work accidents
- b) Preventing occupational diseases
- c) Both of the above

Question 19: According to the provisions of Decree 44/2016/NĐ-CP dated May 15, 2016 of the Government, workers with strict requirements on occupational safety (group 3) must receive at least how many hours of initial periodic training?

- a) 16 hours
- b) 24 hours
- c) 30 hours
- d) 48 hours

Question 20: When suffering from an occupational disease with a 40% reduction in working capacity due to the employer's fault, what benefits will the employee receive if the employer does not pay unemployment insurance and occupational disease insurance?

- a) Monthly allowance
- b) One-time subsidy
- c) Not entitled to benefits
