

NAM VIET OCCUPATIONAL SAFETY TRAINING AND ENVIRONMENTAL MONITORING CO., LTD.

Full name:

Year of birth:

Company:

Please circle one (01) correct answer.

Question 1: During the overall assembly of electronic scales, occupational accidents due to contact with sharp mechanical parts may occur if workers do not use the correct protective equipment. This accident can mainly lead to:

- a) Cut or puncture the skin
- b) Serious injury or broken bones
- c) High temperature burns
- d) Choking or difficulty breathing

Question 2: One of the causes of occupational accidents during assembly is that workers do not fully follow safety procedures. The main causes of this problem are often:

- a) Lack of skills and knowledge of assembly processes
- b) Not wearing protective gloves
- c) Failure to check personal protective equipment
- d) Failure to maintain equipment regularly

Question 3: When assembling the electronic scale as a whole, one of the environmental incidents that can occur is slipping and falling due to a disorganized work area. This can cause accidents due to

- a) Loss of balance and fall
- b) Hard materials collide with the body
- c) Electrical problems
- d) Collision with small components

Question 4: During the process of checking the quality of electronic scales, which of the following accidents can occur if workers do not take safety measures when working with power sources?

- a) Thermal burns
- b) Impact injuries
- c) Electric shock or fire or explosion
- d) Slip and fall due to wet floor

Question 5: The process of calibrating electronic scales requires comparing measured values with standards. If this process is not performed correctly, the risk of causing work accidents can come from

- a) Use of inappropriate tools

- b) Improper quality control
- c) Lack of protection for electronic equipment
- d) Direct contact with hot parts

Question 6: To ensure safety during calibration and quality control, the use of insulating gloves and anti-shock shoes is necessary when

- a) Working with electrical equipment and electronic components
- b) Working with sharp mechanical parts
- c) Conduct product durability tests
- d) Check heat-resistant parts

Question 7: Which of the following is an important factor leading to occupational accidents during the process of calibrating and checking the quality of electronic scales?

- a) Incorrect assembly process
- b) Testing equipment is not properly maintained
- c) Workers are not adequately trained
- d) The working environment is not bright enough

Question 8: To minimize the risk of accidents during the assembly and testing of electronic scales, what equipment maintenance procedures should be performed?

- a) Ensure equipment is regularly inspected and properly calibrated
- b) Make sure all parts are replaced
- c) No need to check the device if there is no problem
- d) Perform maintenance immediately when there is an error

Question 9: When a work accident occurs during the overall assembly process, the first step to take is

- a) Turn off the power or turn off the relevant machinery
- b) Call emergency services immediately
- c) Take the victim to a medical facility
- d) Find the cause of the accident

Question 10: One of the measures to prevent occupational accidents during calibration and quality control is to maintain a tidy work area. This helps to minimize which of the following risks?

- a) Accidents due to electric shock
- b) Slipping or colliding with components
- c) Burns from contact with hot equipment
- d) Cuts or punctures due to contact with sharp mechanical parts

Question 11: When an employee has an occupational disease with a 40% reduction in working capacity due to the employer's fault, what benefits will the employee receive if the employer does not pay unemployment insurance or occupational disease insurance?

- a) Monthly allowance
- b) One-time subsidy
- c) Not entitled to benefits

Question 12: Employees have the right to refuse to do work or leave the workplace while still receiving full pay and not being considered as violating labor discipline when they clearly see a risk of a work accident that seriously threatens their life and health and must immediately report to the person directly in charge, true or false?

- a) True
- b) False

Question 13: Causes of injury when using primitive hand tools

- a) Using damaged tools or tools lacking safety equipment
- b) Using it for purposes other than its intended purpose
- c) Improper operation and use
- d) Both (a and b) are correct.
- e) All three (a, b, and c) are correct

Question 14: According to the Law on Labor Safety and Hygiene, how many obligations do employees have?

- a) 1 obligation.
- b) 2 obligations.
- c) 3 obligations.
- d) 4 obligations.

Question 15: Equip yourself with adequate personal protective equipment to

- a) Preventing work accidents
- b) Preventing occupational diseases
- c) Both of the above

Question 16: Please indicate the correct and complete answer about the conditions for employees to enjoy in-kind compensation.

- a) Doing jobs and occupations in the list of especially arduous, toxic, dangerous jobs and arduous, toxic, dangerous jobs and occupations issued by the Ministry of Labor, War Invalids and Social Affairs

- b) Working in a working environment with at least one of the hazardous or toxic factors that do not meet the hygiene standards permitted by the Ministry of Health or are in direct contact with sources of infectious diseases
- c) Both of the above

Question 17: When an employee has a work accident caused by the Employer's fault and his/her working capacity is reduced by 81%, how much compensation will he/she receive?

- a) 30 Months of Minimum Wage
- b) 30 Months of Social Insurance Salary
- c) 30 months salary according to labor contract.

Question 18: While working, workers can omit some of the contents of the safe working process to do the job faster.

- a) True
- b) False

Question 19: The elements that make up a normal flame are

- a) Oxygen
- b) Combustible substances
- c) Heat source
- d) Both (a and b) are correct
- e) All three (a, b, c) are correct.

Question 20: Employees who work continuously for 8 or 6 hours according to the provisions of the 2020 Labor Code are entitled to a break of at least how many minutes, counted as working hours?

- a) 20 minutes
- b) 30 minutes
- c) 40 minutes
- d) 50 minutes
