

NAM VIET OCCUPATIONAL SAFETY TRAINING AND ENVIRONMENTAL MONITORING CO., LTD.

Full name:

Year of birth:

Company:

Please circle one (01) correct answer.

Question 1: During the assembly of flashlight components, which of the following factors is most important to ensure the finished product functions effectively?

- a) Accuracy in assembling mechanical parts
- b) Use of modern assembly tools
- c) Check product quality after completion
- d) Comply with technical assembly procedures

Question 2: During the quality testing stage of flashlights, what is the most important factor to ensure product safety?

- a) Test product durability under pressure
- b) Check the flashlight's operating features
- c) Check for electrical leakage and material defects
- d) Check the product's water resistance

Question 3: Which of the following occupational accidents is common during flashlight quality testing?

- a) Falling due to narrow working space
- b) Injuries caused by cutting sharp metal parts
- c) Electric shock due to electrical leakage in the product
- d) Damage due to strong impact during impact test

Question 4: What is the main cause of occupational accidents when checking the quality of flashlights?

- a) Using substandard tools
- b) Lack of attention in the inspection process
- c) Not using personal protective equipment
- d) Unclean and poorly lit working environment

Question 5: When assembling flashlight parts, what can pose the highest risk of accident?

- a) Incorrect assembly of mechanical parts
- b) Error in final inspection process
- c) Workers work under tiring and stressful conditions
- d) Use of old and poorly maintained tools

Question 6: What occupational accident prevention measures are necessary when checking flashlight products related to electricity?

- a) Ensure the working environment is bright enough
- b) Periodic inspection of testing equipment and products
- c) Ensure workers have enough rest time
- d) Ensure that chemicals used during testing are properly stored

Question 7: The flashlight quality testing process includes all of the following steps except

- a) Check the product's impact resistance
- b) Check the flashlight's operating features
- c) Quality control of mechanical parts
- d) Check for electrical leaks and fire hazards

Question 8: What is the most important factor in minimizing the risk of occupational accidents when assembling flashlight components?

- a) Train workers on safety measures
- b) Use fully automated tools
- c) Ensure workers have enough rest time
- d) Ensure the work area is tidy and well lit

Question 9: When a work accident involving chemicals occurs during quality control, what is the first emergency response measure?

- a) Ensure workers wash exposed skin areas immediately
- b) Report to medical team and product testing
- c) Isolate the incident area and investigate the cause
- d) Providing information to authorities

Question 10: During the process of assembling flashlight parts, which of the following factors can lead to serious work accidents if the correct procedure is not followed?

- a) Not checking the parts again after assembly
- b) Do not use protective tools when working with electrical components
- c) Failure to perform quality control after assembly
- d) There is no effective system for reporting occupational accidents

Question 11: Employees have the right to refuse to do work or leave the workplace while still receiving full pay and not being considered as violating labor discipline when they clearly see a risk of a work accident that seriously threatens their life and health and must immediately report to the person directly in charge, true or false?

- a) True

- b) False

Question 12: The elements that make up a normal flame are

- a) Oxygen
- b) Combustible
- c) Heat source
- d) Both (a and b) are correct
- e) All three (a, b, c) are correct

Question 13: When a worker has a work accident caused by the Employer's fault and his/her working capacity is reduced by 81%, how much compensation will he/she receive?

- a) 30 Months of minimum wage
- b) 30 Months of Social Insurance Salary
- c) 30 months salary according to labor contract

Question 14: When suffering from an occupational disease with a 40% reduction in working capacity due to the fault of the employer, what benefits will the employee receive if the employer does not pay unemployment insurance and occupational disease insurance?

- a) Monthly allowance
- b) One-time subsidy
- c) Not entitled to benefits

Question 15: Equip yourself with adequate personal protective equipment to

- a) Preventing work accidents
- b) Preventing occupational diseases
- c) Both of the above

Question 16: Fire prevention and fighting measures are

- a) Propaganda and education measures
- b) Technical measures
- c) Administrative and legal measures
- d) Measures to choose fire-resistant or non-fireproof materials right from the design of the constructions
- e) Measures for periodic inspection, maintenance and repair of machinery
- f) All three (a, b, and c) are correct
- g) All five (a, b, c, d, and e) are correct

Question 17: According to the Law on Labor Safety and Hygiene, how many obligations do workers have?

- a) 1 obligation.
- b) 2 obligations.
- c) 3 obligations.
- d) 4 obligations.

Question 18: What will workers get when they have occupational diseases?

- a) Treatment and leave from work.
- b) Treatment until recovery and return to old job.
- c) Treatment until recovery and reassignment to work suitable to health.
- d) Provide financial assistance and help find another job.

Question 19: Which of the following subjects are required to receive occupational safety and hygiene training?

- a) Current employees, newly recruited employees
- b) Apprentices and trainees
- c) Probationary employees, freelance workers hired by the establishment
- d) Both (a and b) are correct.
- e) Both (a, c) are correct.
- f) All three (a, b, c) are correct.

Question 20: While working, workers can omit some of the contents of the safe working process to do the job faster.

- e) True
- f) False
