

## NAM VIET OCCUPATIONAL SAFETY TRAINING AND ENVIRONMENTAL MONITORING CO., LTD.

Full name:

Year of birth:

Company:

Please circle one (01) correct answer.

**Question 1:** Which of the following is the main cause of occupational accidents when operating CNC cutting machines and edge banding machines?

- a) Workers do not use adequate personal protective equipment
- b) Modern machinery does not require inspection before operation
- c) Only inexperienced workers have accidents
- d) Machines can automatically adjust to avoid accidents

**Question 2:** In case of an emergency work accident, what is the first step a worker should take?

- a) Continue working and report after completing the task
- b) Disconnect the machine from power and activate the alarm system
- c) Leave the work area and wait for someone else to handle it
- d) Try to repair the machine immediately

**Question 3:** What dangers can CNC drilling machines cause if they are not regularly maintained?

- a) Quieter operation without affecting workers
- b) Only reduces product quality but does not cause danger
- c) Problems such as stuck drill bit, broken belt or control system error may occur
- d) There is no risk because the CNC drilling machine has high precision

**Question 4:** When working with cutters and drills, what type of protective equipment is most important?

- a) Protective glasses, gloves, dust mask
- b) Reflective vest for easy identification in the working environment
- c) Sports shoes for flexible movement
- d) Construction helmets to protect against impacts from above

**Question 5:** When operating a forming machine, what should workers do to reduce the risk of accidents due to technical errors?

- a) Regular machine inspection and maintenance
- b) Only use the machine when there is a problem that needs repair
- c) Operate the machine at maximum speed to avoid work interruptions
- d) No need to check the machine because they are programmed automatically

**Question 6:** What is the most serious consequence that can occur if workers do not comply with safety regulations when cutting corners and rounding edges?

- a) Product has minor technical defects
- b) Workers may lose fingers or suffer serious injuries
- c) Only affects work productivity but is not dangerous
- d) The machine will stop automatically to avoid accidents

**Question 7:** When dust and debris from the drilling process fly into the worker's eyes, what is the first treatment measure?

- a) Rub your eyes with your hands to quickly remove debris
- b) Rinse eyes immediately with clean water and seek medical attention if necessary
- c) Wait until the eye pain is gone before continuing to work
- d) Look into a bright light to check the extent of the damage

**Question 8:** What is the significance of monitoring the working environment in the process of cutting corners and chamfering edges?

- a) Helps detect potential hazards such as rock dust and electric shock risks early
- b) Only used to evaluate workers' productivity
- c) Ineffective because the accident occurred solely due to personal error
- d) Only required when required by the regulatory authority

**Question 9:** What is one of the common mistakes workers make when working with CNC drilling machines?

- a) Not checking the machine before operating
- b) Set the drilling speed to the lowest setting to avoid wear
- c) Using too much protective equipment causes inconvenience at work
- d) Change drill bits regularly to increase efficiency

**Question 10:** What are the benefits of occupational safety training for workers?

- a) Help workers understand and practice safety procedures correctly
- b) Minimize the risk of work accidents
- c) Ensure workers have sufficient knowledge to respond quickly in emergency situations
- d) All of the above

**Question 11:** What is the purpose of occupational safety and hygiene?

- a) Ensure safety for workers, minimize or prevent accidents, injuries or deaths at work.
- b) Ensure that workers are healthy and do not suffer from occupational diseases or other illnesses caused by poor working conditions.
- c) Maintain, restore health and prolong working time for workers.

- d) All three (a, b, and c) are correct

**Question 12:** According to the Law on Labor Safety and Hygiene, how many obligations do employees have?

- a) 1 obligation.
- b) 2 obligations.
- c) 3 obligations.
- d) 4 obligations.

**Question 13:** When a worker has a work accident caused by the Employer's fault and his/her working capacity is reduced by 81%, how much compensation will he/she receive?

- a) 30 Months of Minimum Wage
- b) 30 Months of Social Insurance Salary
- c) 30 months salary according to labor contract.

**Question 14:** Employees who work continuously for 8 hours or 6 hours according to the provisions of the 2020 Labor Code are entitled to a break of at least how many minutes, counted as working hours?

- a) 20 minutes
- b) 30 minutes
- c) 40 minutes
- d) 50 minutes

**Question 15:** Employees have the right to refuse to do work or leave the workplace while still receiving full pay and not being considered as violating labor discipline when they clearly see a risk of a work accident that seriously threatens their life and health and must immediately report to the person directly in charge, true or false?

- a) True
- b) False

**Question 16:** What will workers get when they have occupational diseases?

- a) Treatment and leave from work.
- b) Treatment until recovery and return to old job.
- c) Treatment until recovery and reassignment to work suitable to health.
- d) Provide financial assistance and help find another job.

**Question 17:** While working, workers can omit some of the contents of the safe working process to do the job faster.

- a) True

b) False

**Question 18:** Equip yourself with adequate personal protective equipment to

- a) Preventing work accidents
- b) Preventing occupational diseases
- c) Both of the above

**Question 19:** According to the provisions of Decree 44/2016/ND-CP dated May 15, 2016 of the Government, workers with strict requirements on occupational safety (Group 3) must receive at least how many hours of initial periodic training?

- a) 16 hours
- b) 24 hours
- c) 30 hours
- d) 48 hours

**Question 20:** When an employee suffers from an occupational disease with a 40% reduction in working capacity due to the employer's fault, what benefits will the employee receive if the employer does not pay insurance for occupational accidents and diseases?

- a) Monthly allowance
- b) One-time subsidy
- c) Not entitled to benefits
