Please circle one (01) correct answer.

Question 1: During the process of manufacturing and installing guitar accessories, what is the main cause of serious hand injuries?

- a) Using hard woods that cause injury when held
- b) Exposure to chemicals during wood surface treatment
- c) Using too much force when installing the neck or bridge
- d) Failure to regularly maintain sharp tools such as saws, knives, and cutters

Question 2: When finishing the surface of a guitar, what is the most serious consequence of using paint spray equipment incorrectly?

- a) Uneven paint layer affects product quality
- b) Inhaling toxic chemicals, which is dangerous to the respiratory system
- c) Increased production time due to uneven drying of paint
- d) Causes fire or explosion due to contact with high heat source

Question 3: During the piano lock installation process, what can happen if the technical process is not followed correctly?

- a) The lock is easily loose, affecting the sound of the piano.
- b) Workers are at risk of electric shock due to contact with metal parts.
- c) The paint on the guitar is peeling off due to the force of tightening the lock too much.
- d) The piano may warp due to uneven pressure applied by the piano key.

Question 4: Failure to organize the working space properly when making a piano can lead to which of the following consequences?

- a) Reduced work efficiency due to time wasted searching for tools
- b) Increased risk of falling due to unorganized items
- c) Increased machinery maintenance costs due to dusty environment
- d) Increased error rate in production due to lack of concentration

Question 5: In case a worker is poisoned by chemicals while finishing the piano surface, what is the first first aid measure that should be taken?

- a) Drink plenty of water to dilute toxins in the body.
- b) Remove the victim from the contaminated area and wash the exposed area.

- c) Call an ambulance immediately without first aid.
- d) Use a strong fan to blow away the surrounding chemical vapors.

Question 6: Which of the following is not correct when talking about the risks of using a polishing machine in the process of finishing the surface of the piano?

- a) The machine may cause hand injury due to jamming or overloading.
- b) Dust from the polishing process can cause respiratory damage if protective measures are not taken.
- c) Workers may be electrocuted if the polishing machine leaks electricity.
- d) The sander can damage the wood structure if used at too low a speed.

Question 7: During quality control after making a piano, why can using inadequate lighting be dangerous?

- a) Makes it easy for workers to miss small errors, affecting product quality
- b) Reduces concentration, easily leads to accidents due to incorrect operations
- c) May cause workers to bend closer during inspection, causing back pain
- d) Fire hazard if bulb overheats

Question 8: During the installation of the guitar neck, which of the following factors is a common cause of technical errors and accident risks?

- a) Using too much force when assembling can cause hand injuries.
- b) Choosing the wrong type of glue causes the neck to not be firmly fixed.
- c) Working in a high humidity environment affects adhesion.
- d) Not checking the string tension before installing the neck

Question 9: Which measure is not a way to prevent occupational accidents when making and finishing a piano?

- a) Train workers on how to use protective equipment and tools
- b) Carry out regular machine inspection and maintenance
- c) Work continuously without rest to complete the product faster
- d) Improve ventilation to minimize the risk of chemical exposure

Question 10: After a work accident occurs, which of the following steps is not part of the emergency handling procedure?

- a) Give first aid to the victim immediately if the situation allows.
- b) Investigate the cause of the accident to come up with preventive measures.
- c) Require workers to continue working immediately after first aid.
- d) Report incidents and make workflow adjustments as needed.

Question 11: While working, workers can omit some of the contents of the safe working process to perform the job faster.

- a) True
- b) False

Question 12: Fire prevention and fighting measures are

- a) Propaganda and education measures
- b) Technical measures
- c) Administrative and legal measures
- d) Measures to choose fire-resistant or non-fireproof materials right from the design of the constructions
- e) Measures for periodic inspection, maintenance and repair of machinery
- f) All 3 sentences (a, b, c) are correct.
- g) All 05 sentences (a, b, c, d, e) are correct

Question 13: When a worker has a work accident caused by the Employer's fault and his/her working capacity is reduced by 81%, how much compensation will he/she receive?

- a) 30 Months of minimum wage
- b) 30 Months of Social Insurance Salary
- c) 30 months salary according to labor contract.

Question 14: According to the provisions of Decree 44/2016/ND-CP dated May 15, 2016 of the Government, workers with strict requirements on occupational safety (group 3) must receive at least how many hours of initial periodic training?

- a) 16 hours
- b) 24 hours
- c) 30 hours
- d) 48 hours

Question 15: Which of the following subjects are required to receive occupational safety and hygiene training?

- a) Employed people, newly recruited people
- b) Apprentices and trainees
- c) Probationers and freelance workers hired by the establishment
- d) Both sentences (a and b) are correct.
- e) Both sentences (a, c) are correct.
- f) All 3 sentences (a, b, c) are correct.

Question 16: What will workers get when they have occupational diseases?

- a) Treatment and leave from work.
- b) Treatment until recovery and return to old job.
- c) Treatment until recovery and reassignment to work suitable to health.
- d) Provide financial assistance and help find another job.

Question 17: According to the Law on Labor Safety and Hygiene, how many obligations do workers have?

- a) have an obligation.
- b) has 2 obligations.
- c) has 3 obligations.
- d) has 4 obligations.

Question 18: Employees have the right to refuse to do work or leave the workplace while still receiving full pay and not being considered as violating labor discipline when they clearly see a risk of a work accident that seriously threatens their life and health and must immediately report to the person directly in charge, true or false?

- a) True
- b) False

Question 19: Causes of injury when using hand-held primitive tools

- a) Using damaged tools or tools lacking safety equipment
- b) Using it for purposes other than its intended purpose
- c) Improper operation and use
- d) Sentences (a and b) are correct.
- e) Sentences (a, b, c) are correct.

Question 20: Equip yourself with adequate personal protective equipment to

- a) Preventing work accidents
- b) Preventing occupational diseases
- c) Both of the above
