

NAM VIET OCCUPATIONAL SAFETY TRAINING AND ENVIRONMENTAL MONITORING CO., LTD.

Full name:

Year of birth:

Company:

Please circle one (01) correct answer.

Question 1: What is the main feature that needs the most attention when installing a water tank in a cooling system?

- a) Make sure the power source is properly connected.
- b) Place the tank in a stable position that is suitable for the system design.
- c) Use heavy components for increased strength.
- d) Install near heat source to increase efficiency.

Question 2: What is the most common cause of slip accidents when installing water systems?

- a) Lack of personal protective equipment.
- b) Water leakage from pipes that are not installed correctly.
- c) Unstable water pressure.
- d) Install in an area without adequate lighting.

Question 3: Which equipment is recommended when working with heavy components such as water tanks?

- a) Vacuum cleaner.
- b) Insulated tools.
- c) Lifting equipment such as cranes or forklifts.
- d) Temperature sensor.

Question 4: Which factor plays the most important role in reducing the risk of water leakage from the system?

- a) Periodically check and maintain equipment.
- b) Use a conduit that is larger than required.
- c) Install the tank in a dry place.
- d) Reduce water pressure to low level.

Question 5: What is one of the important measures to prevent the risk of explosion due to water pressure?

- a) Use stainless steel containers.
- b) Ensure that the duct connections are thoroughly checked.
- c) Reduce system pressure before installation.

- d) Install the system at a temperature lower than ambient

Question 6: In case of an accident due to water leakage, what is the first step to take?

- a) Immediately notify the manager or rescue team.
- b) Turn off the water supply.
- c) Use a water extraction device to dry the area.
- d) First aid for injured people on the spot.

Question 7: Which factor should be given top priority to ensure safety when installing water systems?

- a) Ability to work under high pressure.
- b) Fully equipped with personal protective equipment.
- c) Install the system in the shortest time.
- d) Use expensive pipes.

Question 8: What are the reasons why regular maintenance of water systems is necessary?

- a) To increase worker productivity.
- b) To promptly detect and correct pressure and leakage problems.
- c) To increase the life of the water tank.
- d) To reduce the cost of replacing components.

Question 9: What are the tools needed to check the stability and safety of the water system?

- a) Vibration meter and sound meter.
- b) Pressure gauge and leak detector.
- c) Emergency power cut-off equipment and welding tools.
- d) Microscopes and chemical analyzers.

Question 10: Why is it important to train workers before working with water systems?

- a) To speed up work and finish work sooner.
- b) To enable workers to understand potential hazards and how to prevent accidents.
- c) To enable workers to use expensive components efficiently.
- d) To enable workers to optimize system design.

Question 11: While working, workers can omit some of the contents of the safe working process to perform the job faster.

- a) True
- b) False

Question 12: Fire prevention and fighting measures are

- a) Propaganda and education measures
- b) Technical measures
- c) Administrative and legal measures
- d) Measures to choose fire-resistant or non-fireproof materials right from the design of the constructions
- e) Measures for periodic inspection, maintenance and repair of machinery
- f) All three (a, b, c) are correct
- g) All five (a, b, c, d, e) are correct

Question 13: When a worker has a work accident caused by the Employer's fault and his/her working capacity is reduced by 81%, how much compensation will he/she receive?

- a) 30 Months of minimum wage
- b) 30 Months of Social Insurance Salary
- c) 30 months salary according to labor contract.

Question 14: According to the provisions of Decree 44/2016/ND-CP dated May 15, 2016 of the Government, workers with strict requirements on occupational safety (group 3) must receive at least how many hours of initial periodic training?

- a) 16 hours
- b) 24 hours
- c) 30 hours
- d) 48 hours

Question 15: Which of the following subjects are required to receive occupational safety and hygiene training?

- a) Current workers and newly recruited employees
- b) Apprentices and trainees
- c) Probationary workers and freelance workers hired by the facility
- d) Both (a) and (b) are correct
- e) Both (a) and (c) are correct
- f) All three (a, b, and c) are correct

Question 16: What will workers get when they have occupational diseases?

- a) Treatment and leave from work.
- b) Treatment until recovery and return to old job.
- c) Treatment until recovery and reassignment to work suitable to health.
- d) Provide financial assistance and help find another job.

Question 17: According to the Law on Labor Safety and Hygiene, how many obligations do workers have?

- a) 1 obligation.
- b) 2 obligations.
- c) 3 obligations.
- d) 4 obligations.

Question 18: Employees have the right to refuse to do work or leave the workplace while still receiving full pay and not being considered as violating labor discipline when they clearly see a risk of a work accident that seriously threatens their life and health and must immediately report to the person directly in charge, true or false?

- a) True
- b) False

Question 19: Causes of injury when using hand-held primitive tools

- a) Using damaged tools or tools lacking safety equipment
- b) Using it for purposes other than its intended purpose
- c) Improper operation and use
- d) Both (a) and (b) are correct
- e) All three (a, b, c) are correct

Question 20: Equip yourself with adequate personal protective equipment to

- a) Preventing work accidents
- b) Preventing occupational diseases
- c) Both of the above
