

NAM VIET OCCUPATIONAL SAFETY TRAINING AND ENVIRONMENTAL MONITORING CO., LTD.

Full name:

Year of birth:

Company:

Please circle one (01) correct answer.

Question 1: During the process of assembling components for an induction cooker, what is the purpose of checking the electrical connection?

- a) Ensure components operate synchronously
- b) Ensure product durability
- c) Ensure sensor accuracy
- d) Ensure user safety and avoid electric shock

Question 2: In the process of assembling components for induction cookers, what work accidents can occur if safety procedures are not followed?

- a) Musculoskeletal injuries due to incorrect working posture
- b) Poisoning due to exposure to chemicals
- c) Food poisoning during production
- d) Risk of fire or explosion due to damaged components

Question 3: One of the main causes of occupational accidents during the component assembly process is

- a) Lack of concentration and carefulness at work
- b) Lack of proper working process
- c) Assembly tools are not regularly maintained
- d) All of the above

Question 4: Which of the following measures is necessary to minimize the risk of occupational accidents during component assembly?

- a) Increase working time to complete quickly
- b) Periodically check equipment and tools used in work
- c) Carry out assembly without using protective equipment
- d) Reduce the number of workers involved in the assembly process

Question 5: During quality control, what occupational accidents can occur due to the use of unsafe testing equipment?

- a) Burns from contact with hot components
- b) Electric shock when checking electrical systems without proper isolation
- c) Injuries due to falling materials
- d) Traffic accidents while moving products

Question 6: When a work accident occurs during product quality inspection, what is the first step to take?

- a) Immediately investigate the cause
- b) Stop work and notify management
- c) Report the incident to the authorities
- d) Perform first aid on the victim before reporting.

Question 7: To prevent occupational accidents in quality control work, employees need to be trained in

- a) Product inspection process
- b) Labor safety regulations
- c) Use personal protective equipment
- d) All of the above

Question 8: The electrical safety inspection process during product quality inspection requires employees to

- a) Check electrical connections and isolate the power source before starting work.
- b) Assemble the product without electrical testing
- c) Perform electrical testing in low light environments
- d) Testing electricity without protective equipment

Question 9: Using outdated or poorly maintained test equipment can result in

- a) No defects were detected in the product
- b) Accidents due to unforeseen technical problems
- c) Product quality is not up to standard
- d) All of the above

Question 10: Labor safety regulations when checking product quality require employees to

- a) Use full personal protective equipment such as electrical gloves and safety glasses
- b) Work without protective equipment if not exposed to electricity
- c) No need to periodically check the test equipment
- d) Perform work in low light conditions to easily detect errors

Question 11: Employees have the right to refuse to do work or leave the workplace while still receiving full pay and not being considered as violating labor discipline when they clearly see a risk of a work accident that seriously threatens their life and health and must immediately report to the person directly in charge, true or false?

- a) True
- b) False

Question 12: The elements that make up a normal flame are

- a) Oxygen
- b) Combustible
- c) Heat source
- d) Both (a and b) are correct
- e) All three (a, b, c) are correct

Question 13: When a worker has a work accident caused by the Employer's fault and his/her working capacity is reduced by 81%, how much compensation will he/she receive?

- a) 30 Months of minimum wage
- b) 30 Months of Social Insurance Salary
- c) 30 months salary according to labor contract

Question 14: When suffering from an occupational disease with a 40% reduction in working capacity due to the fault of the employer, what benefits will the employee receive if the employer does not pay unemployment insurance and occupational disease insurance?

- a) Monthly allowance
- b) One-time subsidy
- c) Not entitled to benefits

Question 15: Equip yourself with adequate personal protective equipment to

- a) Preventing work accidents
- b) Preventing occupational diseases
- c) Both of the above

Question 16: Fire prevention and fighting measures are

- a) Propaganda and education measures
- b) Technical measures
- c) Administrative and legal measures
- d) Measures to choose fire-resistant or non-fireproof materials right from the design of the constructions
- e) Measures for periodic inspection, maintenance and repair of machinery
- f) All three (a, b, and c) are correct
- g) All five (a, b, c, d, and e) are correct

Question 17: According to the Law on Labor Safety and Hygiene, how many obligations do workers have?

- a) 1 obligation.
- b) 2 obligations.
- c) 3 obligations.

d) 4 obligations.

Question 18: What will workers get when they have occupational diseases?

- a) Treatment and leave from work.
- b) Treatment until recovery and return to old job.
- c) Treatment until recovery and reassignment to work suitable to health.
- d) Provide financial assistance and help find another job.

Question 19: Which of the following subjects are required to receive occupational safety and hygiene training?

- a) Current employees, newly recruited employees
- b) Apprentices and trainees
- c) Probationary employees, freelance workers hired by the establishment
- d) Both (a and b) are correct.
- e) Both (a, c) are correct.
- f) All three (a, b, c) are correct.

Question 20: While working, workers can omit some of the contents of the safe working process to do the job faster.

- e) True
- f) False
