

NAM VIET OCCUPATIONAL SAFETY TRAINING AND ENVIRONMENTAL MONITORING CO., LTD.

Full name:

Year of birth:

Company:

Please circle one (01) correct answer.

Question 1: During the cutting of fiberglass and carbon fiber fabrics, which risk is the main hazard to workers?

- a) Burns due to heat exposure
- b) Cuts or scratches caused by sharp edges of fibers
- c) Inhalation of toxic chemicals
- d) Mechanical failure

Question 2: In the pressing and interlocking process, what is the main cause of accidents?

- a) Lack of worker skills
- b) Ventilation system problems
- c) Technical problems due to lack of maintenance of machinery
- d) Poorly lit working environment

Question 3: When workers work in an environment exposed to chemicals during the coating process, what is the most important protective measure?

- a) Use cut-resistant gloves
- b) Ensure the ventilation system operates effectively
- c) Wear a gas mask
- d) Ensure adequate lighting

Question 4: In the finishing process of fiberglass and carbon fiber fabrics, what is the main cause of accidents during the coating stage?

- a) Exposure to toxic chemicals
- b) Cut or scratch from the fiber
- c) Instability during pressing
- d) Lack of safety training

Question 5: During the cutting process, what measures should workers take to minimize the risk of accidents?

- a) Use protective armor
- b) Use a gas mask
- c) Use cut-resistant gloves and safety glasses
- d) Ensure there is adequate lighting in the work area

Question 6: Which regulation is mandatory to protect workers when working with presses during the finishing of fiberglass and carbon fiber fabrics?

- a) Workers must wear protective gloves.
- b) The press must be maintained regularly.
- c) Workers must wear gas masks.
- d) The working environment must be well-ventilated.

Question 7: During the process of working with carbon fiber, what risks can cause skin injuries to workers?

- a) Oxygen-deficient environment
- b) Toxic chemicals in the coating process
- c) Sharp edges of carbon fiber
- d) Excessive temperature in carbonization environment

Question 8: What measures are necessary to protect workers from accidents when performing the process of interlocking fiberglass and carbon fiber fabrics?

- a) Ensure adequate ventilation
- b) Use protective armor and safety shoes
- c) Use a gas mask
- d) Ensure stable operation of machinery

Question 9: What is the most important condition to minimize accidents when workers work with chemicals during the coating process?

- a) Use protective equipment such as gas masks
- b) Ensure regular cleaning of the working environment
- c) Ensure workers have enough light while working
- d) Ensure that machinery is regularly maintained

Question 10: To minimize risks in the finishing process of fiberglass and carbon fiber fabrics, which of the following measures is most important?

- a) Increase regular inspection and maintenance of machinery
- b) Ensure workers have adequate protective equipment
- c) Conduct regular occupational safety training
- d) All of the above

Question 11: While working, workers can omit some of the contents of the safe working process to perform the job faster.

- a) True
- b) False

Question 12: Fire prevention and fighting measures are

- a) Propaganda and education measures
- b) Technical measures
- c) Administrative and legal measures
- d) Measures to choose fire-resistant or non-fireproof materials right from the design of the constructions
- e) Measures for periodic inspection, maintenance and repair of machinery
- f) All three (a, b, c) are correct
- g) All 5 (a, b, c, d, e) are correct

Question 13: When a worker has a work accident caused by the Employer's fault and his/her working capacity is reduced by 81%, how much compensation will he/she receive?

- a) 30 Months of minimum wage
- b) 30 Months of Social Insurance Salary
- c) 30 months salary according to labor contract.

Question 14: According to the provisions of Decree 44/2016/ND-CP dated May 15, 2016 of the Government, workers with strict requirements on occupational safety (group 3) must receive at least how many hours of initial periodic training?

- a) 16 hours
- b) 24 hours
- c) 30 hours
- d) 48 hours

Question 15: Which of the following subjects are required to receive occupational safety and hygiene training?

- a) Current workers and newly recruited employees
- b) Apprentices and trainees
- c) Probationary workers and freelance workers hired by the facility
- d) Both (a) and (b) are correct
- e) Both (a) and (c) are correct
- f) All three (a, b, and c) are correct

Question 16: What will workers get when they have occupational diseases?

- a) Treatment and leave from work.
- b) Treatment until recovery and return to old job.
- c) Treatment until recovery and reassignment to work suitable to health.
- d) Provide financial assistance and help find another job.

Question 17: According to the Law on Labor Safety and Hygiene, how many obligations do workers have?

- a) 1 obligation.
- b) 2 obligations.
- c) 3 obligations.
- d) 4 obligations.

Question 18: Employees have the right to refuse to do work or leave the workplace while still receiving full pay and not being considered as violating labor discipline when they clearly see a risk of a work accident that seriously threatens their life and health and must immediately report to the person directly in charge, true or false?

- a) True
- b) False

Question 19: Causes of injury when using hand-held primitive tools

- a) Using damaged tools or tools lacking safety equipment
- b) Using it for purposes other than its intended purpose
- c) Improper operation and use
- d) Both (a) and (b) are correct
- e) All three (a, b, c) are correct

Question 20: Equip yourself with adequate personal protective equipment to

- a) Preventing work accidents
- b) Preventing occupational diseases
- c) Both of the above
