

## NAM VIET OCCUPATIONAL SAFETY TRAINING AND ENVIRONMENTAL MONITORING CO., LTD.

Full name:

Year of birth:

Company:

**Please circle one (01) correct answer.**

**Question 1:** What is the most important skill required for assembling components in the production of measuring equipment?

- a) Creativity and design ability
- b) Precision and meticulousness in every detail
- c) Communication and teamwork skills
- d) Knowledge of marketing and advertising

**Question 2:** Which occupational accident is the most dangerous when working with welding equipment during the assembly of parts?

- a) Burns due to direct contact with hot parts
- b) Burns from welding sparks
- c) Slipping when working on slippery surfaces
- d) Coming into contact with improperly installed electronic components

**Question 3:** What is the main cause of occupational accidents during the integration of measuring equipment systems?

- a) Lack of understanding of software and firmware
- b) Lack of compliance with safety procedures when working with electronic equipment
- c) Lack of supervision from management
- d) Abuse of electronic tools and devices

**Question 4:** During assembly of parts, what accidents can occur if the work area is not kept neat and clean?

- a) Electrical short circuit and electric shock
- b) Slipping and tripping over falling objects
- c) Cut or puncture by sharp objects
- d) All of the above

**Question 5:** Why is periodic maintenance of equipment and tools important during system assembly and integration?

- a) Ensure tools are always ready for use
- b) Minimize the possibility of causing accidents due to technical problems

- c) Increase work efficiency
- d) Ensure the aesthetics of the tool

**Question 6:** During the system integration process, what must workers do to ensure the equipment operates correctly and efficiently?

- a) Install software and firmware correctly
- b) Check and replace damaged components
- c) Arrange the components according to the technical diagram
- d) All of the above

**Question 7:** To prevent work accidents, what should train for employees in the field of system integration include?

- a) Knowledge of software and how to install software properly
- b) Use tools and electronic equipment safely
- c) Emergency handling skills
- d) All of the above

**Question 8:** When a work accident occurs during assembly, what should be done first to minimize damage?

- a) Call for help immediately
- b) Provide basic first aid to the victim
- c) Stop work and ensure the safety of those around you
- d) Report incidents to management

**Question 9:** In case of an electrical accident occurring while assembling equipment, what is the first step in handling the situation?

- a) Check the victim's condition and provide first aid
- b) Disconnect the power immediately
- c) Call an ambulance immediately
- d) Conduct an investigation into the cause of the incident

**Question 10:** What do safety regulations require workers to do during the assembly of measuring equipment components?

- a) Make sure the workspace is always clean and well lit.
- b) Use full personal protective equipment
- c) Periodic equipment inspection and maintenance
- d) All of the above

**Question 11:** What is the purpose of occupational safety and hygiene?

- a) Ensure safety for workers, minimize or prevent accidents, injuries or deaths at work.
- b) Ensure that workers are healthy and do not suffer from occupational diseases or other illnesses caused by poor working conditions.
- c) Maintain, restore health and prolong working time for workers.
- d) All three (a, b, and c) are correct

**Question 12:** According to the Law on Labor Safety and Hygiene, how many obligations do employees have?

- a) 1 obligation.
- b) 2 obligations.
- c) 3 obligations.
- d) 4 obligations.

**Question 13:** When a worker has a work accident caused by the Employer's fault and his/her working capacity is reduced by 81%, how much compensation will he/she receive?

- a) 30 Months of Minimum Wage
- b) 30 Months of Social Insurance Salary
