

NAM VIET OCCUPATIONAL SAFETY TRAINING AND ENVIRONMENTAL MONITORING CO., LTD.

Full name:

Year of birth:

Company:

Please circle one (01) correct answer.

Question 1: During the process of attaching the chip to the smart card, the contactless chip needs to be securely attached to ensure

- a) Ability to transmit signals over wires
- b) The ability to transmit waves without being hindered by surrounding materials
- c) Impact resistance when moving
- d) Energy saving ability

Question 2: Work accidents during chip attachment can be caused by

- a) Using machinery without protection
- b) Exposure to chemicals without adequate ventilation
- c) Lack of training in the use of protective equipment
- d) All three (a, b, and c) are correct

Question 3: The common cause of occupational accidents when connecting electronic circuits is

- a) Workers are not fully trained in welding procedures
- b) Using unprotected welding equipment
- c) Working environment lacks adequate light and ventilation
- d) All of the above

Question 4: To minimize occupational accidents when attaching chips to smart cards, which measure is the most important?

- a) Training workers on chip attachment process and equipment use
- b) Reduce working hours to reduce fatigue
- c) Enhance lighting system in the factory
- d) Using fully automatic machines

Question 5: In the process of connecting electronic circuits, workers must avoid

- a) Using bare hands to handle sensitive electronic components
- b) Ensure that circuit connections are not overlapped
- c) Perform welding operations at low temperatures
- d) Both (a and b) are correct

Question 6: Which working environment can increase the risk of occupational accidents during electronic circuit connection?

- a) Environment lacking effective ventilation system
- b) Environment without enough light
- c) Untidy working environment, easy to fall
- d) All of the above

Question 7: Which measure is not a way to prevent occupational accidents during the process of connecting electronic circuits?

- a) Make sure to use personal protective equipment such as heat-resistant gloves
- b) Train workers on work procedures and safe use of tools
- c) Promote a clean and tidy working environment
- d) Eliminate all welding equipment during production

Question 8: When a work accident involving chemicals occurs during the chip attachment process, the first first aid measure is

- a) Clean the wound with antiseptic solution
- b) Cut off the power immediately
- c) Wash the area exposed to the chemical with clean water
- d) Change contaminated clothing and provide first aid for burns

Question 9: When handling a work accident during the electronic circuit connection stage, workers must

- a) Stop work immediately and notify the manager
- b) Continue work so as not to disrupt production
- c) Notify medical staff only after completing the work
- d) Both (b and c) are correct

Question 10: Personal protective equipment that must be used during electronic circuit connection includes:

- a) Cut-resistant gloves and goggles
- b) Protective shoes and dust mask
- c) Heat-resistant gloves and eye protection
- d) Both of the above

Question 11: While working, workers can omit some of the contents of the safe working process to perform the job faster.

- a) True
- b) False

Question 12: Fire prevention and fighting measures are

- a) Propaganda and education measures
- b) Technical measures
- c) Administrative and legal measures
- d) Measures to choose fire-resistant or non-fireproof materials right from the design of the constructions
- e) Measures for periodic inspection, maintenance and repair of machinery
- f) All three (a, b, c) are correct
- g) All five (a, b, c, d, e) are correct

Question 13: When a worker has a work accident caused by the Employer's fault and his/her working capacity is reduced by 81%, how much compensation will he/she receive?

- a) 30 Months of minimum wage
- b) 30 Months of Social Insurance Salary
- c) 30 months salary according to labor contract.

Question 14: According to the provisions of Decree 44/2016/ND-CP dated May 15, 2016 of the Government, workers with strict requirements on occupational safety (group 3) must receive at least how many hours of initial periodic training?

- a) 16 hours
- b) 24 hours
- c) 30 hours
- d) 48 hours

Question 15: Which of the following subjects are required to receive occupational safety and hygiene training?

- a) Current workers and newly recruited employees
- b) Apprentices and trainees
- c) Probationary workers and freelance workers hired by the facility
- d) Both (a) and (b) are correct
- e) Both (a) and (c) are correct
- f) All three (a, b, and c) are correct

Question 16: What will workers get when they have occupational diseases?

- a) Treatment and leave from work.
- b) Treatment until recovery and return to old job.
- c) Treatment until recovery and reassignment to work suitable to health.
- d) Provide financial assistance and help find another job.

Question 17: According to the Law on Labor Safety and Hygiene, how many obligations do workers have?

- a) 1 obligation.
- b) 2 obligations.
- c) 3 obligations.
- d) 4 obligations.

Question 18: Employees have the right to refuse to do work or leave the workplace while still receiving full pay and not being considered as violating labor discipline when they clearly see a risk of a work accident that seriously threatens their life and health and must immediately report to the person directly in charge, true or false?

- a) True
- b) False

Question 19: Causes of injury when using hand-held primitive tools

- a) Using damaged tools or tools lacking safety equipment
- b) Using it for purposes other than its intended purpose
- c) Improper operation and use
- d) Both (a) and (b) are correct
- e) All three (a, b, c) are correct

Question 20: Equip yourself with adequate personal protective equipment to

- a) Preventing work accidents
- b) Preventing occupational diseases
- c) Both of the above
